Spring 2016 Monday Seminar Program

February 22  NITIN BALIGA (Host: Stephen Small, Chair)  
Senior VP & Director, Institute for Systems Biology  
“Systems biology, environment, and health”

February 29  RICH BONNEAU (Host: Stephen Small, Chair)  
Biology, NYU  
“Mechanistic connections between the microbiome and immune system”

March 7  COLEEN MURPHY (Host: Sevinc Ercan)  
LSI Integrative Genomics and Molecular Biology, Princeton  
“Insulin signaling in the regulation of cognitive decline”

March 21  ASHER CUTTER (Host: Matt Rockman)  
Evolutionary Genomics, University of Toronto  
“Caenorhabditis nematodes from population genomics to speciation”

March 28  EVAN EICHLER (Host: Christine Rushlow)  
HHMI, Genome Sciences, University of Washington  
“From copy number variation to genes: The genetics of autism”

April 4  PIALI SENGUPTA (Host: Andreas Hochwagen)  
Biology, Brandeis  
“Form meets function: Structurally diverse cilia and sensory signaling”

April 11  OLIVER RANDO (Host: Sevinc Ercan)  
Biochemistry, UMass Medical  
“Mechanical disassembly and reassembly of reproduction in mammals”

April 18  SARAH COBEY (Host: Elodie Ghedin)  
Ecology & Evolution, University of Chicago  
“Coevolutionary dynamics of influenza and adaptive immunity”

April 25  MARIA BARNÁ (Host: Lionel Christiaen)  
Developmental Biology & Genetics, Stanford  
“Novel modes of cellular communication”

May 2  JAMES HIGHAM (Host: Fei Li)  
Anthropology, NYU  
“A perceptual approach to the evolution of primate coloration”

May 9  MICHAEL WIGLER (Host: Aditi Nadkarni, Scicchitano Lab)  
Molecular Biology, Cold Spring Harbor Laboratory  
“Strange ways to see the genome, why and how”

Seminars are at 4:00 pm Mondays at the CGSB Auditorium, 12 Waverly Pl.  
A reception will follow each seminar.
